CONTACT ADHESIVES

Contact Adhesives

When using contact adhesives please follow the health and safety instructions carefully. Pay particular attention to ensure that there are no naked flames and, as the fumes are heavy, beware of low level pilot lights. When using these glues on polystyrene ensure that the glue has completely dried before joining sheets as trapped solvent can cause damage even with recommended adhesives. See also Resin 999 on page 120.

Evo-stik TX 528 [polystyrene X] Just like the Evo-stick 528, a synthetic rubber resin contact adhesive but with a thixotropic agent which makes it much easier to apply. This jelly-like adhesive spreads like soft butter rather than hot gruyère. Ideal for use on large and vertical surfaces as well as intricate work. It is easier to control and less likely to stray onto clean areas. Particularly suitable for bonding decorative laminate sheets and rigid plastic sheets of PVC or ABS. Adhesive: UN 1133. Cleaner: UN 1993.

General Purpose Adhesive

[polystyrene ✓] This is a very popular brush-grade general purpose contact adhesive. It will work on painted or unpainted steel. This adhesive has a strong wet tack for fibrous materials and excellent adhesion. When working with polystyrene only use it as a contact adhesive allowing each side to thoroughly dry before bringing the surfaces together. It rapidly dries in 15 minutes and

when dry conforms with BS 476 Part 6 and Part 7 Class 1 fire rating suitable for stage use behind the iron. Toluene-free. UN 1133. Covers 4 m² per litre.

Evo-stik Impact

[polystyrene X] Similar to the 528, this contact adhesive bonds decorative laminates, wood, chipboard, hardboard, rigid PVC, ABS plastics, leather, cork, stone, china and earthenware. Sold in small sizes for convenient storage in the touring prop skip.

Polystyrene Contact Adhesive

[polystyrene ✓] Previously called Tretobond 375, this is a synthetic rubber-resin contact adhesive based in a blend of solvents. Used for the bonding of expanded polystyrene to itself, and to other smooth surfaces. Both surfaces require a thin uniform coat; the adhesive spreads easily. The surfaces must be completely dry [otherwise the trapped solvents can have a deleterious effect on polystyrene] before they are brought together preferably under pressure. Health and Safety information should be strictly followed. Do not mix the cleaner into the glue.

Evo-stik 528 [polystyrene X] A synthetic rubber resin contact adhesive based in a blend of solvents. The most popular general purpose contact adhesive particularly suitable for bonding decorative laminate sheets and rigid plastic sheets of PVC or ABS. New faster drying formula. Adhesive: UN 1133. Cleaner: UN 1993.

Treadfast SF 108

A pressure sensitive adhesive for vinyl floor and wall coverings. It is solvent-free non-flammable and has low toxicity. Treadfast 108 will give a strong permanent bond. Use a notched trowel to apply and immediately roll with a paint roller wetted with the adhesive. Allow to dry [goes clear] then position and roll with 68 kg roller. Covers 6 - 8 m² per litre.

CLOTH ADHESIVES

Copydex Adhesive Natural rubber latex solvent-free non-flammable adhesive used widely for bonding canvas, serge, velour as well as paper, card, cork, plastic, etc... When using with serge or velour the adhesive will show through if too much pressure is applied. It can be used as a contact or wet bond glue.

What happened to Copydex!

What a strange thing! We used to sell pallet loads of Copydex in 5 L pots but the manufacturers decided, in their infinite wisdom, to only do silly little pots. We pleaded on your behalf but to no avail. We don't particularly want to have adhesives especially made for us but we had our hand forced. So if you want large quantities of Copydex why not try Flints...dex ☹.

F

Flints...dex A quick grab latex adhesive for use on paper, card, wood, plastic, metal, cork, fabric, carpet, leather, canvas and many more materials. If making cut cloths be sure to dust any excess glue with French Chalk [page 25] before rolling up to prevent accidental dry contact gluing.

- ✓ Safe and easy to use
- ✓ Solvent-free
- ✓ Economically priced
- ✓ Water-based
- ✓ Free flowing – apply by brush or spreader
- ✓ Can be used to coat the back of floor cloths for a non-slip finish

Clam 2 Brummer Latex Adhesive

A rubber latex solvent-free non-flammable adhesive which provides an exceptionally strong bond with a good open time for working on large areas. Thixotropic, it can be applied by brush or roller and is generally used for fixing canvas to open framed flats – see below ☹.

Clam 2 can also be used for bonding leather, cork, card, etc.

- ✓ Tenacious strength

Canvassing open frame flats with Clam 2

Firstly, staple your scenic canvas 6 mm in from the inside edge of the frame along the long edge, flap back the canvas revealing the frame, brush on the Clam, fold back the canvas and rub with a piece of timber with the arris removed to force the glue into the material. Once the long edge has set [just a few minutes] staple the canvas around the rest of the frame [ensuring it is kept square] and repeat using the same technique. The Clam 2 is strong enough to stop the canvas puckering up behind the staples. Once the whole flat is glued down, take a "Stanley" knife with a sharp blade and trim off the excess canvas about 4 mm in from the flat's outer edge using your thumb as a guide. Trim a little bit off the corners at 45° and that's it. Allow overnight before priming.

Great for Polystyrene too!

Flints Cyclorama Glue

This best-selling environmentally friendly glue is water-based and safe to use. We highly recommend it for sticking large canvas murals and cycloramas but it has many other uses including bonding vinyl dance floor to plywood or hardboard. Many of our clients use it to consolidate texturing compounds such as rubber crumbs. It makes a great polystyrene adhesive too! It can be used as a dry bond, wet bond or contact adhesive.

Its unique advantages when used as a **dry bond** are:

- ✓ **No bleed through** The glue will not damage the artwork. As the glue is only applied to the wall and the cloth is positioned when the glue is dry it cannot bleed through.
- ✓ **Repositionable** If you get a wrinkle in your cloth or it goes out of alignment just gently peel back and try again.
- ✓ **Removable** It is not permanent. You can actually remove the artwork from the wall when you have finished and no glue sticks to the canvas. Just roll the canvas up and transport to the next venue. It saves having to slit cloths down scenery joins after the first venue of a tour and allows expensive scenic artwork to travel separately from its heavy backings.
- ✓ **Paint off site** Murals can be painted in the artist's studio rather than having to close down public areas of museums etc. while the painting is taking place.
- ✓ **Water-based** It is water-based and is safe to use in areas where other contact adhesives could not be risked. The virtual lack of odour makes it a good choice when venues need to be re-opened quickly, reducing down time.
- ✓ **Multi-Purpose** The glue can also be used as a wet lay or double bond for more permanent applications. It is suitable for bonding vinyl and rubber as well as natural cloths.
- ✓ **Easy and clean to use** The adhesive comes with simple instructions and your tools just clean in water. Application is best using a notched trowel with 2 mm notches every 5 mm [see page 131] and then rolling with a pre-wetted short pile roller to provide a completely smooth surface.

Covers approximately 4.5 - 5 m² per litre. Also in 15 L pails.

The Three Methods

Dry Bond Apply the adhesive to the wall and allow to dry. Gently position the cloth on the wall, adjust as necessary, then press down firmly. The cloth can be removed at a later date by peeling off.

The Double Bond Flints Cyclorama Adhesive performs well as a water-based contact adhesive. Apply adhesive to both the wall and the cloth. Allow to dry. Press the cloth onto the wall for a permanent bond. This method will provide a strong bond for many surfaces including dance floors.

Wet Bond Use as a conventional glue. Apply the cloth to the wet adhesive and allow to dry for a permanent bond. Use it to consolidate texturing compounds such as foam crumbs.

Rosco Flexbond Adhesive Clear flexible scenic glue which bonds many porous and non-porous scenic materials. Dries to a clear hard but pliable coating that does not remain "tacky" as other flexible coatings do. The adhesive bond does not crack and break when flexed. Recommended for bonding textures such as micafil and rubber granules. This adhesive also works well on polystyrene. Flexbond is water-based and safe to use.

Canvassing with hot size

Size is best used on open frame flats as it is too difficult to maintain a hot fluid glue on ply clad flats [use Sheppy M155 for ply clad flats]. For open frame flats, staple your scenic canvas 6 mm in from the inside edge of the frame along the long edge, flap back the canvas revealing the frame, brush on the hot size to the timber with a glue brush. While the glue is still warm, fold the canvas down and swab through with a warm damp cloth until a soap appears on the surface of the canvas. Ideally, this is done with two people, one gluing and the other swabbing. Keeps you lovely and warm, although you won't smell great. Repeat on the other three sides once the long edge has set up. Trim 4 mm in with a sharp "Stanley" knife.

Granular Size The most popular traditional glue for sticking canvas to timber flats and also used in the preparation of traditional primers and scenic paints [page 24]. To prepare size as a glue, mix 1 part of size with 1.5 parts of water whilst agitating. Leave to soak for one hour. Then dissolve by warming in a double bucket [water jacket] diluting further to a working consistency. Do not exceed 55°C.

WOODWORKING ADHESIVES

Scotch Glue A high quality jelly bone glue, manufactured from selected raw materials. It has a breaking strain far in excess of BS 745. It is recommended for antique restoration, chair frames, veneering, and any trade where a first class, long-lasting joint is necessary. Preservatives in this formulation keep the glue free from mould and bacteria for a long time in the glue pot. Its slower setting characteristics enable the glue to penetrate hard woods and provides a longer open time for intricate assembly work and veneering operations. To use: Warm gently until it reaches the consistency of paint, never so hot that it shows steam.

Flints PVA Wood Glue 5 kg own-label replacement for Evo-Stik's popular Resin 168. We hope this will become the go-to PVA for scenic workshops for many years. It is a quality, cost-effective PVA for the frequent user with strong adhesion just 20 minutes after application. Edd Smith, the Workshop Manager at Scottish Opera, fed back "we will be moving to the new Flints product straight away". It is suitable for bonding wood to wood and Formica to wood. It is not designed to be used in a wet environment. We supply it in 5 L containers and also in handy 25 L plastic drums with a tap for easy dispensing. Covers approximately 7.5 m² per litre.

SPRAY APPLIED ADHESIVES

Fast and Class 1 flame resistance

TuskBond XPRO Rising prices are affecting us all and the same is true within the realm of contact adhesives. So we have made a decision to drop the popular TensorGrip L17 Adhesive and replace it with TuskBond XPRO. A brand new product, TuskBond XPRO uses the latest solvent technology to make an adhesive that rivals Tensorgrip in

terms of performance but is lower toxicity and non - chlorinated, a win-win. For use with Spray Gun and Hose. Also available in 500 ml aerosol

- ✓ Great for covering large areas.
- ✓ Great for permanent bonds with high initial bond.
- ✓ Fast Drying
- ✓ Web Spray Pattern

Suitable for: ✓ Wood ✓ Metals ✓ Rubber ✓ Fabric ✓ Cardboard
 ✓ Polythene ✓ Concrete ✓ Laminates ✓ Most Plastics.

X Not for use with Vinyls containing large amounts of plasticiser as it can migrate over time.

MASTIC ADHESIVES

Sabatack 750 XL This is our replacement product for Sikaflex 291. It is an MS Polymer that adheres superbly to metals and plastics. Its principle use would be to make gap filling high tensile bonds of fittings to ships and trucks etc. It can be used anywhere where dissimilar materials need bonding, with the mastic also forming a waterproof seal all in one process. May be used for bonding teak decking down to substrates.

- ✓ Fully UV stable
- ✓ Long shelf life
- ✓ Contains no solvents or isocyanates
- ✓ Can be easily overpainted
- ✗ Rather slow drying in cold weather

SPECIFICATION: Hardness: shore A 55. Skin time: 15 minutes. Open time: 30 minutes. Viscosity: medium. Green strength: low. Cure rate: 3mm/24 hr. Tensile strength: 2.6N/mm². Shear strength: 1.7N/mm². Elongation at break: 330%. Temperature resistance: -40°C to +120°C. Shelf life: 18 months.

Pinkgrip Richard Black just insisted that we stock this product which has an instant strong grip with no drooping. Battens can just be stuck to a wall where they will remain without additional fixings even while the glue sets. He raves about its qualities as if he owns shares. Richard claims to have built entire sets just using Pinkgrip, let's just hope he doesn't get into aeronautics. The Solvent-free version is brilliant for using with acrylic mirror.

MASTIC SEALANTS

FA600 (Tremsil) A medium modulus neutral silicone sealant. Good for general purpose sealing and caulking. It is ideal for bedding in glass. Conforms to BS 5889 [1989] Type A. These silicone sealants do not make high tensile bonds so products bedded with them can normally be removed without too much disruption to the substrate.

MASTIC GUNS

Flints only stocks top quality Cox mastic guns which will not crumple up when you are halfway through a Sunday fit-up. UK manufacture.

Easiflow HD

A low cost gun for the professional tradesman whose work includes the semi-frequent application of sealants. It has been produced continuously since 1971 and differs from imitators by having up to ten times the working life of some models. It has a 7:1 ratio trigger and a patented pressure release device which virtually eliminates sealant "flow-on". The drive rod is bent to provide a handy hook.

SPECIALIST COSTUME ADHESIVES

E6000+ & E6000+ Spray We first heard about this adhesive through the rather excellent Costume Networking group on Facebook [if you work in costume or wardrobe, we highly recommend you check it out - it's a mine of information!] and we quickly realised we needed to try it out for ourselves. Gary tested it out for us, and found it to be just the ticket - easy to use, didn't run on a vertical surface, adhered well to hard plastics, glass, metal, expanded polystyrene, fabrics (and remains flexible), can be put through a washer or dryer. The spray worked really well on wallpaper, and a hem! We can see this

could be extremely useful for model-makers too, as can be applied to painted surfaces without having nasty solvents dissolve the paints. How did we live without it? Odourless too. Popular for sticking gems onto costumes. We only stock this clear version as both a tube with nozzle applicator and a spray bottle.
