MASKING TAPES

Masking Tapes

We stock a wider range of products to suit all your needs. Our standard masking tape will happily stick to canvas. We have listed the adhesion strengths so you can choose tapes for delicate surfaces and we also stock some high precision tapes for those perfect crisp graphic stripes [top tip, paint the tape in the base colour first for a really crisp finish]. All the tapes are different colours so they won't get mixed up in your tool box. Remember for best results remove the tape while the paint is tacky and pull away from the paint surface at 45°. If your tape needs to remain in place for long periods choose the yellow or blue types designed to be removed without leaving residue after periods up to 5 months!

FROGTAPE

Frogtapes

We always have requests for Frog Tape as a familiar brand name however we find it pales in comparison to our precision masking tapes (both for long-life removal and for delicate surfaces). Also, it comes in totally unnecessary plastic packaging, so we're not fans of its poor environmental credentials.

Frogtape Designed for use with emulsion paint, Frogtape can be used to create crisp lines, minimising paint bleed. Available in a multi-surface and a delicate version. The multi-surface tape will adhere to wood, glass, metal and stone and can be used for most paint applications. The delicate tape is recommended for decorative painting and can be applied to freshly painted materials or sensitive surfaces.

DANCE FLOOR TAPE

ReUselt The revolutionary way to install flooring! Now you can install virtually any floor surface over any existing sub-floor* without messy adhesives, or having to hire expensive flooring contractors. A semi-permanent installation with permanent performance and feel! The ReUselt system gives you all the benefits of a permanent installation with the ease of a semi-permanent installation without the use of top tape or the hassle of resetting your floor every two years. Yet when you need to remove the floor you simply peel it up and take it away. Simply purchase new supply of ReUselt and install at your new location. Used ReUselt can be removed from the sub-floor and thrown away. You can install it yourself and it's idiot proof.

*An exception is MDF which can be very dusty even when you think it is clean as because of the way it is made there are always particles in the pores. MDF is almost never used for any type of flooring but if it is used make sure it is sealed MDF so then bonding won't be an issue.

Personal favourite!

One Wrap This is one of the most useful products in the catalogue. One Wrap is a black double-sided hook and loop fastener. The hooks are on one side and the loops are on the other. Just wrap it around and it will secure to itself! It allows the tape to be used as a replacement to cable ties or as a tidy for hemp lines, extension leads or airlines. It leaves no sticky mess associated with adhesive tapes and no sharp edges like those on nylon cable ties. It is surprisingly strong yet easy to release. A roll of this on tour will keep everything neat and tidy. 20 mm is the most popular size.
